

# Waste Management

1. Always comply with national laws when disposing of empty packaging or leftover spray/seeds.
2. Never reuse empty containers, even after rinsing them.
3. Puncture empty and rinsed containers to avoid others using them.
4. Never dispose of pesticide waste in the environment!!
5. When you dispose of empty treated seed bags, make sure to minimize dust.

## TIPS TO MINIMIZE WASTE:

- Only buy the amount of product you need
- Only prepare the amount of spraying solution you need
- Avoid spills

## HOW CAN YOU CLEAN YOUR EMPTY CONTAINERS?

You must triple-rinse them.

Fill 30% of the bottle! Rinsing with the correct water volume is more important than the amount of time taken shaking the container.

Treated seed bags cannot be triple rinsed. Fold them carefully, place in a strong plastic bags, and dispose as hazardous waste!
